IDENTIFIERS *Maryland; *School District Personnel

ABSTRACT

This report presents an analysis of salaries earned by professional staff employed in Maryland public schools. The report covers selected central office staff, school level administrators, teachers, and other professionals. The salaries are derived from local payroll records of individuals and include annual base pay, determined by education and experience, plus stipends for longevity, extra duties, and extended contracts. Salaries of part-time positions are equated to full-time. Table 1 presents the local education agency (LEA) and statewide calculations of the average and median salary, as well as the salaries at the first and third quartiles for each position classification. Table 2 shows the average, median, and quartiles for classroom teachers by regions with LEA salaries indexed to the regions. Table 3 presents the average instructional salary and the percent change between 1986 and 1994. (ND)

Salaries of Professional Staff Employed in Maryland Public Schools as of October, 1994
Classroom Teachers' Salaries Indexed to Region
Average Salaries for Selected Positions and Percent Change: 1986 and 1994

INTRODUCTION

The following report presents an analysis of salaries earned by professional staff employed in Maryland public schools. The report includes selected central office staff, school level administrators, teachers, and other professionals. The salaries are derived from local payroll records of individuals and include their annual base pay, determined by education and experience, plus stipends for longevity, extra duties, and extended contracts. Salaries of individuals employed part-time are equated to full-time.

Table 1 presents the local education agency (LEA) and statewide calculations of the average and median salary, as well as the salaries at the first and third quartiles for each position classification. Table 2 shows the average, median, and quartiles for classroom teachers grouped by regions with LEA salaries indexed to the region. Table 3 presents the average instructional salary and the percent change between October, 1986 and October, 1994.

Calculations

Average (mean) salaries, computed by summarizing individual salaries and dividing the total by the number of equivalent positions in the group, is the figure most frequently used for comparison. However, it's value is influenced by extremely high or low salaries in the distribution and may not provide a true estimate of the population average. Therefore, the median is also provided as a more stable calculation of "average salary." The median represents the salary which divides the group in half where fifty percent earn more and fifty percent earn less. The first and third quartiles provide an estimation of the distribution of salaries across the group. For example, the bottom twenty-five percent is determined by the salary of the first quartile and the top twenty-five percent is determined by the salary at the third quartile. Inspection of Table 1 indicates that the twenty-five percent of the classroom teachers in the State are paid \$31,416 or less, while twenty-five percent earn a salary of \$47,667 or higher.

Position Classifications

The position types used in this report are based on definitions prescribed in the Specifications and Procedures Manual for the Staff Reporting System. Directors, coordinators, and supervisors include persons in charge of instructional and administrative functions, maintenance and operation of schools, food service, health and transportation. Persons whose time is split between functions are counted once in their primary function.
